Monique Galapagos Luxury Cruise - 4 Nights, Itinerary D (Sunday to Thursday)

4 Nights • Luxury Experience

www.palacetours.com travel@palacetours.com 786-408-0610

Overview

This 4-night Itinerary D sails Sunday to Thursday aboard the M/C Monique and visits San Cristobal, South Plaza, Santa Fe, Bartolome, Santiago, Genovesa and Santa Cruz. Fares start at US$5,190 per person in a double cabin, with departures listed below through 2028. A good choice for guests who want a quieter hybrid boat at a lower fare.

The M/C Monique is a 16-guest catamaran with eight Golden Double Staterooms, four on the main deck and four on the upper deck, plus one single stateroom kept for odd-numbered groups and families. Solo travellers take a Golden Stateroom for sole use at a 50% single supplement. Staterooms are furnished with a king bed or two twins, a private bathroom and large picture windows.

The main deck has a forward observation platform, an indoor dining room and a panoramic lounge. The upper deck offers a shaded terrace and a bow sun terrace, and the sky deck brings an outdoor lounge, al-fresco dining, a bar and a whirlpool. Monique runs on hybrid engines with solar panels and lithium batteries, so the boat is quieter at anchor than most of its generation.

The crew-to-guest ratio is close to one to one, with a Cruise Service Officer assigned to each cabin. Licensed Galapagos National Park naturalist guides lead the excursions in groups of eight; snorkelling equipment, wetsuits and kayaks are included.

COMMON QUESTIONS

Frequently Asked Questions

When is the best time to visit Galapagos?

> Galapagos is a place that can be visited at any time. There are two season, and the warmest is between December and May. It is the time of year when the sky is always clear, and the sun shines strongly. If you love to dive in amazing places, the best time to visit Galapagos is from June to November. During this season the weather is a little cooler, but it gives you the chance to enjoy the best from Galapagos' famous marine reserve.

What should we bring?

> Since the islands are situated very near the Equator, we recommend that you bring lightweight clothing and of course, don't forget your swimsuits, sun lotion, and good footwear.

How long is the flight from Ecuador to the Galapagos?

> It depends from where you depart. Flights to the Galapagos leave from Quito and Guayaquil. It takes about half an hour to get from Quito to Guayaquil and roughly one and a half hours from Guayaquil to the islands.

Are there any immunizations required/recommended?

> For the Galapagos Islands there are no required or recommended immunizations. If you, however, intend to spend more time in Ecuador, especially in the jungle, immunization is highly recommended. As this changes from time to time please check with your local health office (or the Institute for Tropical Diseases) a few weeks in advance of your trip.

Are single or triple suites available?

> Most of our cruises will assign double cabins to all passengers unless you want to pay the single supplement if traveling alone. Triple cabins can also be arranged on request, depending on availability and the vessel you choose.

What is the time zone of the Galapagos Islands?

> The Galapagos Islands are 6 hours behind GMT (equivalent to USA Central Standard Time)

Does the equatorial line cross the Galapagos Islands?

> The equatorial line does pass through the Galapagos, just north of Isla Santiago. Please refer to our Itinerary page to see which itinerary passes through the equatorial line.

What are marine currents like the Galapagos?

> The Galapagos Islands waters have the Humboldt Current's influence that brings cold waters especially during the mist rainy season (cool weather) from July to December. The warm season is during the months of January to June. The southeast trade winds become weaker and the water from the Panama Basin remains warm. During this season there is more of a tropical climate with some occasional rains. "El Niño" current may cause a much greater flow of warm waters, making the surface warmer and rainfall increase.

What is the water temperature in the Islands?

> Average water temperatures in Galapagos:
> January - June: 70°F - 80°F (20°C - 26°C)
> July - December: 65°F - 75°F (18°C- 23°C)

Can you snorkel in the Galapagos?

> *Restrictions and fees might apply, please contact us for more information.
